

- Download FortiClient from this URL - <https://www.fortinet.com/support/product-downloads#vpn>

- From LGN network use below configuration to configure client (Use provided username for username field)

- From Public network use below configuration to configure client(Use provided username for username field)

The screenshot shows the FortiClient VPN application window. The title bar reads 'FortiClient' with 'File' and 'Help' menus. The main header is 'FortiClient VPN' with a shield icon and a notification area on the right. A banner below the header says 'Upgrade to the full version to access additional features and receive technical support.' The main content area is titled 'Edit VPN Connection'. It has three tabs: 'SSL-VPN' (selected), 'IPsec VPN', and 'XML'. The configuration fields are as follows:

Field	Value
VPN	SSL-VPN
Connection Name	From Public Network
Description	From Public Network
Remote Gateway	43.224.125.254
Client Certificate	None
Authentication	Save login (selected)
Username	username

Additional options include: '+Add Remote Gateway', 'Customize port' (65443), 'Enable Single Sign On (SSO) for VPN Tunnel', and 'Enable Dual-stack IPv4/IPv6 address'. At the bottom are 'Cancel' and 'Save' buttons.

-
- Select appropriate connection and use credentials.
